Subject: Give Portland a Healthy River

Dear Administrator Gina McCarthy,

The draft cleanup plan falls short - very short - of what is needed for a healthy river.
With increased demand for public use as well as habitat, we must have a better solution!!

These steps would help significantly:

1. Select Alternative G with additional dredging in areas of high human use, areas of high ecological value, and areas where there is high risk of recontamination of the river.
2. Set strict timelines and metrics for success.
3. The chosen alternative must result in fish healthy enough for everyone to eat!
4. EPA's cleanup plan must include the heavily contaminated uplands as well as the heavily contaminated river.
5. Eliminate the confined disposal facility which would create a permanent toxic waste dump in our river. That is kicking the can down the river, so to speak.

Use our tax money wisely to benefit the greater community and the place we live in.

Thank you.
